

# iRobot Roomba 655 Pet Series Battery Replacement

How to replace your battery on your Roomba.

Written By: Matt Davis

## INTRODUCTION

Removing the battery is an important step because it takes away the power from the device so you don't harm any of the other components. It should be one of the first things you should do.

---

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Removing the Side Brush

- Flip the device over onto its back
  - Unscrew the single screw that connects the side brush to brush motor using the Phillips head #2 screwdriver
- i** *This screw does not come out of the yellow side brush*

## Step 2 — Removing the Back Panel

- Remove the four Phillips #1 screws on the back panel.
- Pop off the back plate once the screws are loose by gently prying away from the body
- ⓘ *The screws don't come completely out of the panel, but it will still come apart once unscrewed.*

## Step 3 — Removing the Battery

- Grab the two pieces of green tape with your thumb and index finger
- Pull up on the battery in an upwards direction to remove it

## Step 4 — Battery Contact Points

- These are the contact points on the Roomba for the battery
- These are the contact points on the battery
- ⓘ If these contact points are dirty, they can be cleaned with a moist microfiber cloth (distilled water recommended)

To reassemble your device, follow these instructions in reverse order.
